

Lhoist North America  
Texas Soil Stabilization List Price Zones

July 9, 2018 – Lhoist North America has completed its quarterly review of Lime Slurry pricing for soil stabilization in Texas. As a result of the significant impact of increased competition for trucks and drivers as well as new trucking regulations, all new quotes for Lime Slurry will reflect a \$10 per ton increase effective immediately. Existing pricing will be honored on quoted projects.

The following zone maps display Texas regional lime slurry prices for soil stabilization. The next price review date is October 1, 2018. Please contact your Regional Sales Manager to discuss job specific details.
